

# Safety Awareness

The background of the image depicts a construction site with several large cranes and building structures under construction. In the foreground, there are several safety-related elements: a yellow triangular hazard sign with black diagonal stripes is positioned in the top left; a yellow and black striped barrier tape runs horizontally across the bottom; a yellow dump truck is visible on the right side; and a yellow and black striped road sign with a dump truck icon is on the far left.

# Prioritize Safety, Protect Lives

## Why Safety Matters?

Workplace safety is essential to prevent injuries, reduce liabilities and create a positive work environment. Having a strong safety culture allows employees to identify and understand risks, and eventually contribute to hazard prevention. Prioritizing safety reflects a company's commitment to its people and helps build a strong, reliable reputation.

# How to reduce hazards 101

## Identify

Spot hazards that could endanger employees on site and recognize unsafe behaviors early.

## Understand

Analyze the root causes and conditions that can lead to hazards, and assess the risks they pose.

## Implement

Apply effective control measures to prevent harm and ensure a continuously safe workplace.

# Type of accidents

Slip and fall

Chemical exposure

Ergonomic strain

Electrical hazards

# Standard Safety Procedure

**Wear required PPE**  
(Use of personal protective equipment on site)

**Emergency protocols**  
(know the location of exits, fire extinguishers, first aid kits, and assembly points.)

**Report hazards immediately**  
(Inform your supervisor of any unsafe conditions, spills, damaged equipment, or potential risks.)

**Safe equipment handling**  
(Use tools and machines only if you're trained and authorized, and follow operating instructions.)

# Training programs- for a safer workplace

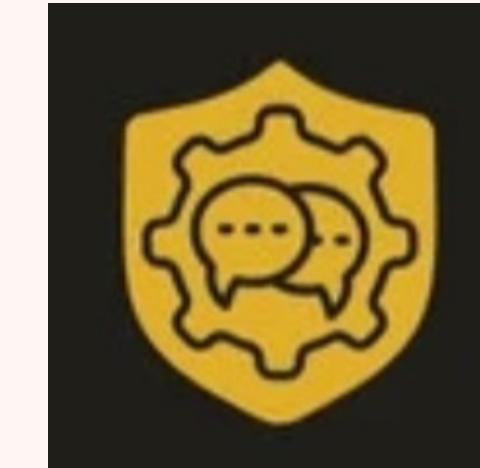

## Building awareness

Workplace safety procedures help prevent accidents. Regular training and following the rules make the workplace safer for everyone.

### REGULAR TRAINING PROGRAM:

Teaching employees how to recognise and avoid risks.

### SAFETY ADVISORY:

Encouraging employees to report hazards and engage in open communication.

# Being ready for emergencies

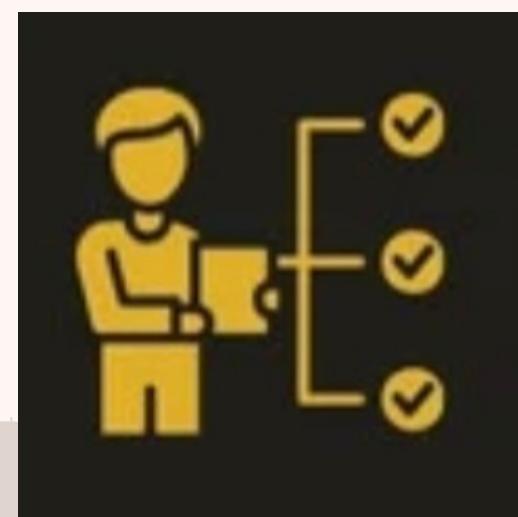

Workplaces need clear emergency plans to help employees know what to do in serious situations. Training and practice can save lives and prevent more damage.

First aid training

Fire safety

Evacuation plans

# Ensuring proper use of protective gear

Wearing protective equipment properly helps prevent injuries at work and meets safety rules.

## PROTECTIVE EQUIPMENT

Proper use of gloves, helmets, and masks.

## SAFETY SIGNAGE

Clear warnings for hazardous areas.

## REGULATORY COMPLIANCE

Following workplace safety laws and guidelines.

# Improving workplace safety overtime

Checking and improving safety regularly helps workplaces avoid risks and keep employees safe.

## **Safety Audits:**

Regular inspections to identify and address risks.

## **Employee feedback:**

Encouraging staff to report safety concerns.

## **Recap training:**

Conducting regular training sessions for employees.

**Let's work together for a  
safer future!!**
